

ENERGY

solutions for petroleum and gas compression

Complete Solutions for Gas Compression

Energy International provides off-shore and on-shore energy solutions for the petroleum and gas industry. Our products include services for gas compression and rental compressors which adapt to a variety of production conditions and demands.

When you need to install or increase your compression, for a short or long term period for production, gathering, transportation, processing and storage; our widely experienced engineers and technicians in the industry, will help you with the best solutions for equipment and services.

We have many years experience in the management, installation, operation and maintenance of compressors in different applications.

Cat and Caterpillar are registered trademarks of Caterpillar Inc.
