Petrobras - Ecuador , 17.6 MW
Hybrid plant (burning associated gas & crude oil) for electric power generation

Oil & Gas

Off-shore and on-shore Cat® engines set the standard for the petroleum industry. Since 1930, Caterpillar® has been providing reliable growth in oil and gas applications throughout the world. Cat engines can burn crude oil, diesel and a wide variety of field gases, with a product line that ranges from 50 to 10,000 HP they can compete with virtually any power, speed or fuel specification required.

We have provided power solutions to a variety of petroleum producing companies in Latin America and the Caribbean. We have supplied mobile power modules with a wide range of ratings – from 20 kilowatts to over 2 megawatts to meet specific petroleum and gas production energy needs.

Whether you need to generate power or to increase power for production on a platform, Energy International can help you source the best equipment. We have accumulated experience in both fields by providing base power for platforms in Trinidad with the Cat 3400 series of gas and diesel engines and in Brazil through the use of 3600 generator sets. We have also accumulated experience in providing reliable power solutions for drilling and production fields on-shore.

Energy International solves all your power requirements for oilfield applications such as off-shore platforms or more complex projects including sound attenuation studies.

Cat and Caterpillar are registered trademarks of Caterpillar Inc.

Dygoil 3 x Cat® 6CM25 engines, 5.2MW Ecuador

Petroecuador, 3 x Cat® 3612 crude fuel pumping packages, Ecuador

Pluspetrol & Ferrenergy, 4 x 16PA6B heavy fuel gen sets, Peru

Promigas - Colombia

Gas Compression System

Gas Compressors

- State of the art, field proven
- Driven by Gas, Diesel, or HFO fueled engines
- Temporary or permanent compressor systems
- Reciprocating or rotary screw compressors
- Power ratings from 85 – 8,100 HP
- Experienced Engineers for Commissioning and Startup

Ecopetrol

Provincia Gas Compression Station

1 x CAT G3608+DR6HOS4+Cooler. Compression Natural Gas, Gas Volume 9MSCFD

Turn-key project – Complete EPC . Assembly, Commissioning and start up
